

CANGINI & TUCCI
BLOWN GLASS LIGHTING

MADE IN ITALY

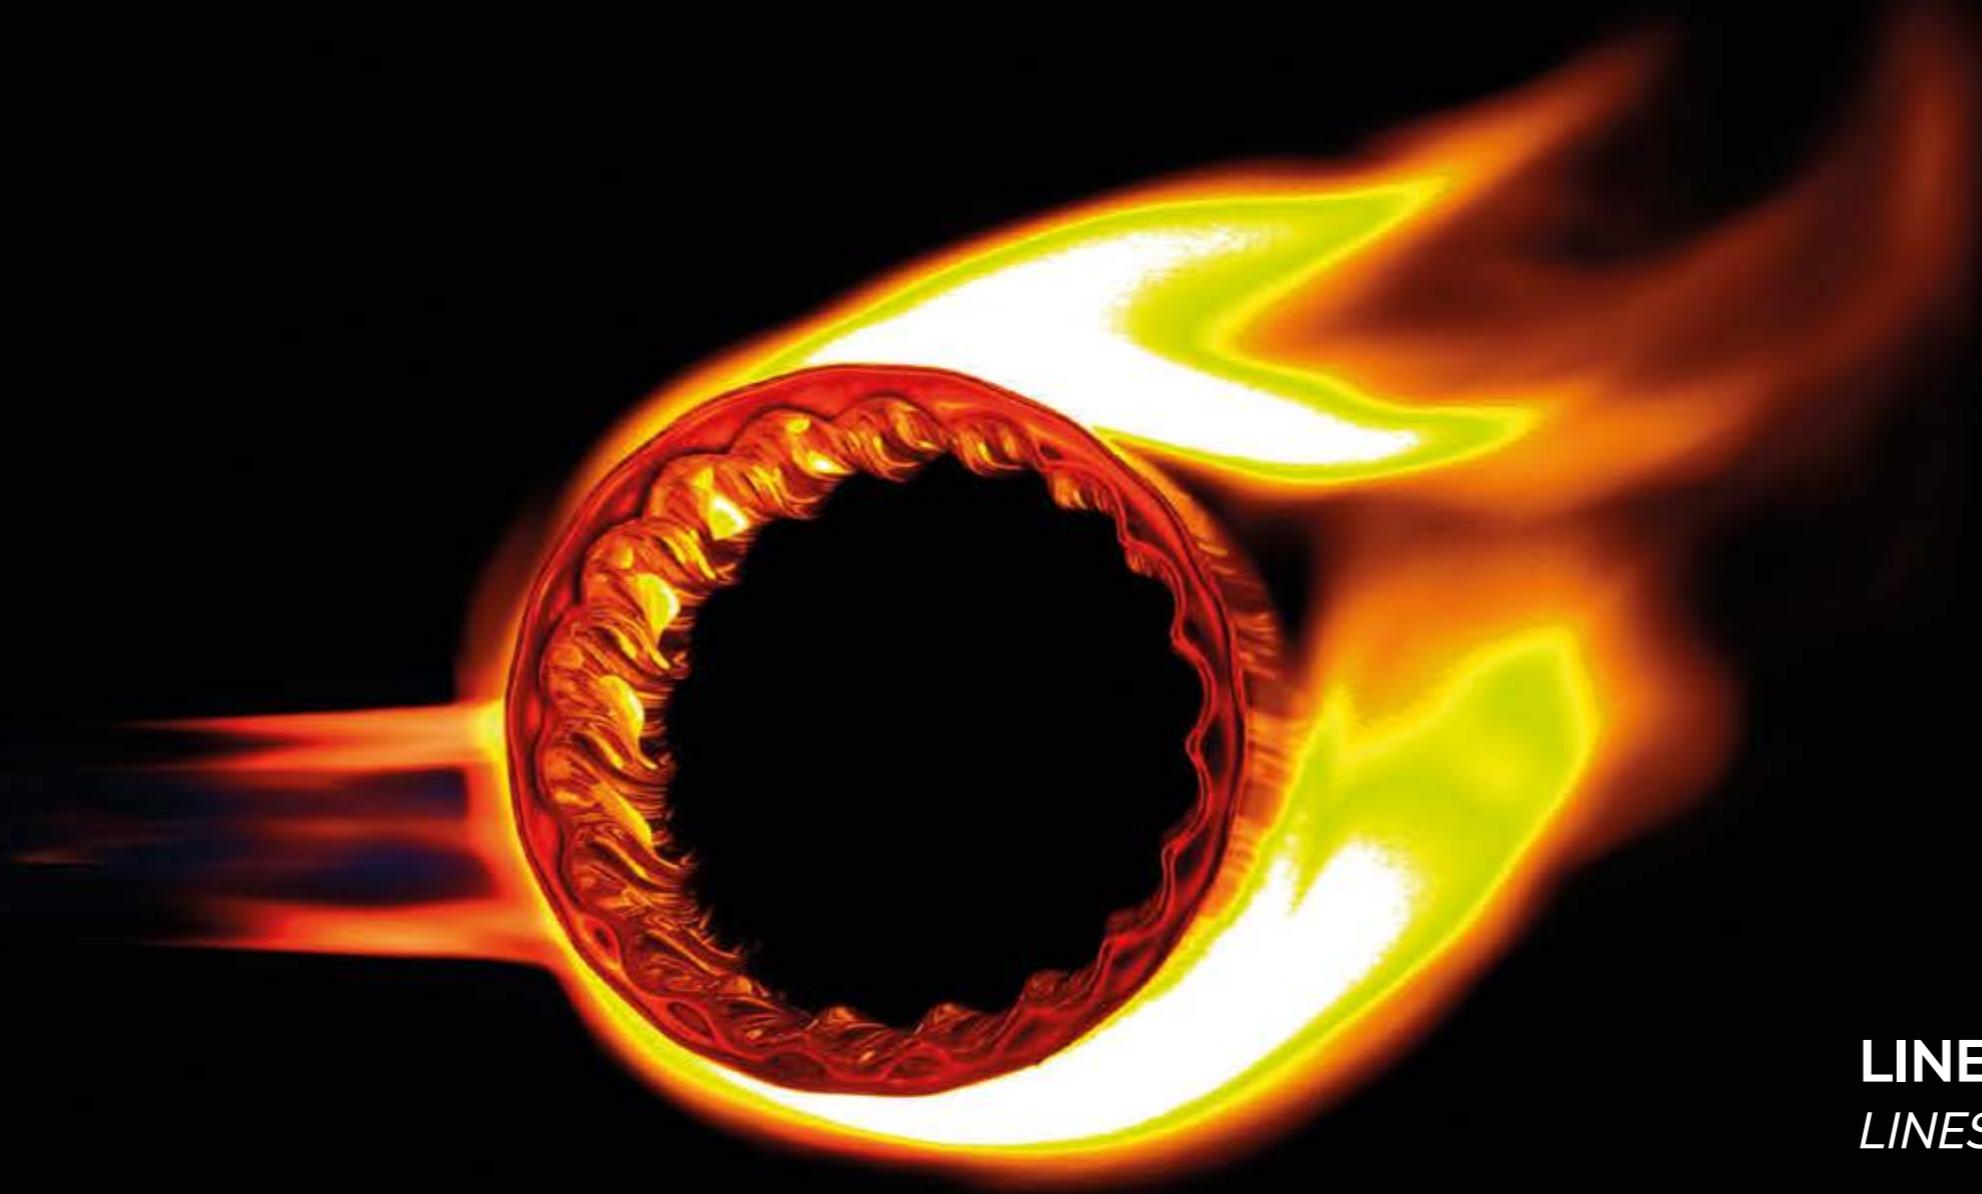

2018

Le lavorazioni e la metallizzazione del vetro di Cangini e Tucci sono interamente realizzate a mano da artigiani esperti. Ogni componente viene scaldata a fiamma e lavorato lentamente dedicando cura e tempo al delicato processo di trasformazione. Il valore aggiunto che questo processo - interamente manuale - conferisce al prodotto è inestimabile. La storia di ogni singolo elemento in vetro è fatta anche di piccole imperfezioni di finitura, di difformità dimensionali impercettibili che attestano la diversità di ogni singolo prodotto e, quindi, la sua unicità.

The processing and metallization of Cangini e Tucci glass are entirely handmade by expert craftsmen. Each component is heated by flame and worked slowly, dedicating care and time to the delicate process of transformation. The added value that this process - entirely manual - gives the product is inestimable. The history of each individual glass element is also made up of small finishing imperfections, imperceptible dimensional differences that attest the diversity of each single product and, therefore, its uniqueness.

LINEE DI LUCE *LINES OF LIGHT*

"Segni e linee prendono forma tra fuoco e materia.
La luce si descrive nell'irregolarità del vetro creando tenui ombre ed esaltando
tutta la sapienza di gesti antichi, dove l'unicità della forma si sposa al design.
Questo è il nostro modo di interpretare e rendere viva la luce".

*"Signs and lines take shape from fire and raw materials.
The light is described in the irregularity of the glass creating soft shadows and
enhancing all the wisdom of ancient gestures, where the uniqueness of the form is
combined with design. This is our interpretation of bringing light to life".*

Inti era la divinità Inca del sole, un giorno ordinò ai suoi figli di costruire la capitale del regno. Essi avrebbero dovuto vagare per la terra con un divino bastone d'oro e avrebbero dovuto conficcarlo nel luogo predestinato alla creazione della città. Così nacque Cuzco e si sviluppò la civiltà inca.

Sono partito da questo mito come ispirazione per la nuova famiglia di prodotto per Cangini e Tucci. La scelta dei materiali è stata fondamentale per lo sviluppo della linea. Ho scelto l'ottone come elemento strutturale per l'intera famiglia, sviluppandolo in tre varianti di finitura: lo spazzolato, il brunito ed il ramato. Il vetro è stato trattato con una finitura a gradiente che va sfumando dal bianco opaco al trasparente, in modo da evitare l'abbagliamento quando si guarda direttamente la lampada. Questo processo, così come lo sviluppo di tutti i vetri Cangini e Tucci, è realizzato interamente a mano e rende ogni prodotto diverso dagli altri. Racconta una storia fatta di artigianalità, di cura del dettaglio e di rapporto diretto tra maestro soffiatore e vetro. Eventuali imperfezioni di finitura sono da considerare segni fondamentali di questo racconto perché secondo noi Made in Italy significa soprattutto unicità e fatto a mano. Il terzo materiale è il cemento, utilizzato per realizzare i rosoni, i binari e le basi della piantana, gli elementi che vanno a toccare direttamente la struttura dell'abitazione. L'artigianalità del processo di realizzazione degli elementi in cemento fa sì che ogni pezzo sia unico, differente da tutti gli altri come finitura superficiale e impreziosito da dettagli tipici delle malte cementizie, quali venature e microporosità. Inti è un mix di tradizione artigiana e innovazione tecnologica, l'intera famiglia è stata progettata e realizzata in Italia, fondendo la conoscenza artigiana con metodologie di lavorazione all'avanguardia, quali la stampa 3d e la prototipazione rapida.

Inti was the Inca divinity of the sun, one day he ordered his sons to build the capital of the kingdom. They would have to wander the earth with a divine stick of gold and would have to stick it in the place predestined for the creation of the city. Thus Cuzco was born and the Inca civilization developed.

I started from this myth as inspiration for the new product family for Cangini and Tucci. The choice of materials was fundamental for the development of the line. I chose brass as the structural element for the whole family, developing it in three finishing variants: brushed, burnished and coppered. The glass has been treated with a gradient finish that goes from opaque white to transparent to avoid dazzling when you look directly at the lamp. This process, as well as the development of all Cangini and Tucci glasses, is made entirely by hand and makes each product different from the others. It tells a story of craftsmanship, attention to detail and direct relationship between master blower and glass. Imperfections of finish are to be considered fundamental signs of this story because according to us Made in Italy means above all uniqueness and handmade. The third material is cement, used to make the canopies, the tracks and the bases of the floor lamp, the elements that directly touch the structure of our environments. The craftsmanship of the process of making concrete elements means that each piece is unique, different from all others as a surface finish and embellished with typical details of cement mortars, such as grain and microporosity. Inti is a mix of traditional craftsmanship and technological innovation, the entire family has been designed and built in Italy, combining artisan knowledge with cutting-edge processing methods, such as 3D printing and rapid prototyping.

Inti war die Inka-Gottheit der Sonne, eines Tages befahl er seinen Söhnen, die Hauptstadt des Königreichs zu bauen. Sie mussten die Erde mit einem göttlichen Goldstab durchwandern und mussten es an den Ort legen, der für die Erschaffung der Stadt vorbestimmt war. So wurde Cuzco geboren und die Inka-Zivilisation entwickelte sich. Ich begann mit diesem Mythos als Inspiration für die neue Produktfamilie für Cangini und Tucci. Die Wahl der Materialien war grundlegend für die Entwicklung der Linie. Ich wählte Messing als Strukturelement für die ganze Familie und entwickelte es in drei Ausführungsvarianten: gebürstet, brüniert und verkupfert. Das Glas wurde mit einer Verlaufsfarbe behandelt, die von opak weiß bis transparent reicht, um Blendungen beim direkten Blick auf die Lampe zu vermeiden. Dieser Prozess, sowie die Entwicklung aller Cangini und Tucci Gläser, wird komplett von Hand gemacht und macht jedes Produkt anders als die anderen. Es erzählt eine Geschichte von Handwerkskunst, Liebe zum Detail und direkte Beziehung zwischen Meister Gebläse und Glas. Jede Unvollkommenheit des Finishs gilt als Grundpfeiler dieser Geschichte, denn Made in Italy bedeutet für uns vor allem Einzigartigkeit und Handarbeit. Das dritte Material ist Zement, der für die Herstellung der Rosetten, der Schienen und der Sockel der Stehleuchte verwendet wird, die die Struktur des Hauses direkt berühren. Die Kunstfertigkeit des Herstellungsprozesses von Betonelementen bedeutet, dass jedes Stück einzigartig ist, sich von allen anderen als Oberfläche unterscheidet und mit typischen Details von Zementmörteln wie Korn und Mikroporosität versehen ist. Inti ist eine Mischung aus traditioneller Handwerkskunst und technologischer Innovation. Die gesamte Familie wurde in Italien entworfen und gebaut und verbindet handwerkliches Wissen mit modernsten Verarbeitungsmethoden wie 3D-Druck und Rapid Prototyping.

Инти был божеством инков солнца. Однажды он повелел своим сыновьям построить столицу инков Куско на месте, где упадет божественный золотой клин, который они несли, бродя по земле.

Таким образом появился город Куско и развилась цивилизация инков.

Я начал с этого мифа в качестве вдохновения для новой коллекции для Cangini&Tucci. Выбор материалов был фундаментальным для развития линии. Я выбрал латунь как структурный элемент для всей коллекции, представляя ее в трех вариантах отделки: матовый, полированный и медный. Стекло обработано градиентно и плавно переходит от непрозрачного белого до прозрачного, чтобы добиться более комфортного восприятия света, когда вы смотрите непосредственно на лампу. Этот процесс, а также обработка всех стекол Cangini&Tucci, производится полностью вручную и делает каждый продукт уникальным. В нем рассказывается история мастерства, внимание к деталям и прямая связь между мастером и стеклом. Любые несовершенства отделки должны считаться неотъемлемыми признаками этой истории, потому что made in Italy означает прежде всего уникальность и ручную работу. Третий материал - цемент, используемый для изготовления потолочных оснований и основания торшеров, элементов, которые интегрируются непосредственно в структуру дома. Каждый элемент из бетона также неповторим и отличается друг от друга по своей текстуре и пористости – типичным характеристикам цементных растворов. Inti – это сочетание традиционного мастерства и технологических инноваций, вся коллекция была спроектирована и произведена в Италии, сочетающая знания ручного производства с передовыми методами обработки.

Alberto Manzoni è nato a Cesena nel 1983, studia design prima a Firenze e poi al Politecnico di Milano.

Dopo 10 anni trascorsi a Milano torna a Cesena e fonda Labomaki Srl, uno studio di progettazione per il design del prodotto e degli interni. Attualmente è docente al Politecnico di Milano e docente al master di design strategico di Poli.design.

"Il design per me è prima di tutto ricerca, il progettista deve trovare una storia interessante da raccontare e deve fare in modo che l'utente possa capirla quando utilizza il prodotto. Non si tratta solo di progettare in maniera corretta un oggetto, o uno spazio. Bisogna saper emozionare l'utente, e questo riesci a farlo se hai una storia da raccontare.

Quando ho cominciato a lavorare con Cangini & Tucci mi sono reso conto subito che è un'azienda con due anime. Da una parte c'è il vetro, puro, trasparente e fragile, quasi etereo, ed è la parte creativa dell'azienda. Dall'altra ci sono le macchine: i torni, le fiamme ossidriche e i forni, il metallo, che invece è l'anima più razionale e tecnica. Poi c'è il fuoco, che è luce ed è l'elemento che anima il vetro, che gli dà forma. Le prime volte che entravo in officina stavo ore impalato a guardare i processi di trasformazione che sono un vero e proprio spettacolo.

Con la linea AUF ho cercato di far coesistere queste due anime, da una parte la razionalità di un cilindro di metallo che contiene una sorgente a Led e si ripete uguale in ogni prodotto, dall'altra l'elemento in vetro che varia in 4 forme differenti e in diverse finiture e colori. Ho fatto poi in modo che metallo e vetro si unissero attraverso un semplice o-ring di gomma che rende molto semplice la fase di montaggio e smontaggio della lampada ed evita il contatto diretto tra i due materiali".

Alberto Manzoni was born in Cesena in 1983, he studied design first in Florence and then at the Politecnico of Milan.

After 10 years spent in Milan, he goes back in Cesena and founds Labomaki Srl, a design studio for product and interior design. He currently teaches at the Politecnico of Milan and he is lecturer at the master design of Poli.design.

"Design for me is first of all research, the designer has to find an interesting story to tell, and must make sure that the user can understand it when using the product. It's not only designing a product correctly, or a space. You must be able to excite the user, and you can do this if you have a story to tell.

When I started working with Cangini e Tucci I realized immediately that it is a company with two souls. On one side there's the glass, pure, transparent and fragile, almost ethereal, and is the creative part of the company. On the other side the are the machines: lathes, the torches and furnaces, the metal, which is the rational and technical soul. Then there is the fire, which is light and it is the element that animates the glass, which gives it shape. The first time I walked into the factory I was stuck for hours watching the transformation processes, a real spectacle.

With AUF I tried to coexist these two souls, on one side the rationality of a metal cylinder containing an illuminant source that repeats in every product, on the other side the glass element that varies in 4 different shapes and in different finishes and colours. Then I made sure that metal and glass were joined through a simple rubber O-ring that makes the assembly and disassembly of the lamp very simple and avoids the direct contact between the two materials".

Il processo di metallizzazione viene eseguito con metodo artigianale.

Piccole imperfezioni più o meno evidenti sono inevitabili e ne attestano valorizzandone l'esecuzione manuale della stessa.

Il processo non utilizzando codici RAL può dare luogo a differenti tonalità di colore che possono cambiare da una fase di lavorazione all'altra a distanza di tempo.

L'azienda riserva e garantisce un attento controllo di qualità.

The metallization process is handcrafted.

Small imperfections are inevitable and they attest the manual execution of the process.

The process does not use RAL codes, therefore this can give rise to different shades of colour that can change from a phase of production to another in a distance of time.

The company reserves and guarantees a careful quality control.

Sehr geehrte kunde wir gratulieren für den Kauf unserer leuchten die Metallisierung Prozess erfolgt in handwerkliche verfahren kleine imperfektionen sind nicht verhinderbar und wertschätzen das Kunst-Handwerk.

Leider sind keine Standard Farbskala einsetzbar daher sind leichte Ton Unterschiede in dem Farbergebnis bei unterschiedlichen Lieferungen möglich.

Die Firma garantiert eine akkurate Qualität Kontrolle.

Процесс металлизации проводится с использованием традиционных ремесленных методов.

Маленькие, более или менее очевидные недостатки неизбежны и свидетельствуют о ручной обработке стекла.

Процесс металлизации не предусматривает использование кодов цвета RAL. Поэтому со временем при производстве может иметь место незначительное варьирование в оттенке. Компания гарантирует тщательный контроль качества.

The company reserves and guarantees a careful quality control.

Sehr geehrte kunde wir gratulieren für den Kauf unserer leuchten die Metallisierung Prozess erfolgt in handwerkliche verfahren kleine imperfektionen sind nicht verhinderbar und wertschätzen das Kunst-Handwerk.

Leider sind keine Standard Farbskala einsetzbar daher sind leichte Ton Unterschiede in dem Farbergebnis bei unterschiedlichen Lieferungen möglich.

Die Firma garantiert eine akkurate Qualität Kontrolle.

Процесс металлизации проводится с использованием традиционных ремесленных методов.

Маленькие, более или менее очевидные недостатки неизбежны и свидетельствуют о ручной обработке стекла.

Процесс металлизации не предусматривает использование кодов цвета RAL. Поэтому со временем при производстве может иметь место незначительное варьирование в оттенке. Компания гарантирует тщательный контроль качества.

SOPHIA

Il processo di metallizzazione viene eseguito con metodo artigianale.

Piccole imperfezioni più o meno evidenti sono inevitabili e ne attestano valorizzandone l'esecuzione manuale della stessa.

Il processo non utilizzando codici RAL può dare luogo a differenti tonalità di colore che possono cambiare da una fase di lavorazione all'altra a distanza di tempo.

L'azienda riserva e garantisce un attento controllo di qualità.

The metallization process is handcrafted.

Small imperfections are inevitable and they attest the manual execution of the process.

The process does not use RAL codes, therefore this can give rise to different shades of colour that can change from a phase of production to another in a distance of time.

The company reserves and guarantees a careful quality control.

ZANDERS-Kalender – Traumadventure verloren auf Neuseeland versteckt und entdeckt werden. Der Kalender hat eine Art geheimnisvolle Erzählung, die durch verschiedene Illustrationen und Beschreibungen erzählt wird. Diese Illustrationen sind von einer kleinen Gruppe von Künstlern erstellt worden, die sich auf die Themen des Kalenders konzentriert haben. Der Kalender ist ein wundervolles Geschenk für alle, die nach einem besonderen Kalender suchen.

Although our gallery has been travelling all over the world, we often hear the same questions again and again. This information is only a small part of what you can find in our website. There is much more information and interesting things to see and learn. This website is a great source of information about our gallery and its artists. We hope you will enjoy it.

Colori disponibili per tutti i prodotti dove c'è fonte di calore e dove l'elemento illuminante non ha aria a sufficienza per il raffreddamento.

Colours available for all products where there is a source of heat, and where the lighting element has not enough air for cooling.

Colori NON disponibili per elementi illuminanti CHIUSI dove il calore della fonte luminosa non ha aria a sufficienza per il raffreddamento.

Si consiglia di non usarli nei diffusori chiusi come per esempio nell'articolo Goccia. Per ogni linea è stata inserita la tabella cromatica per i diffusori, vi preghiamo di rispettarla.

Colours NOT available for CLOSED lighting elements where the heat of the light source does not have enough air for cooling.

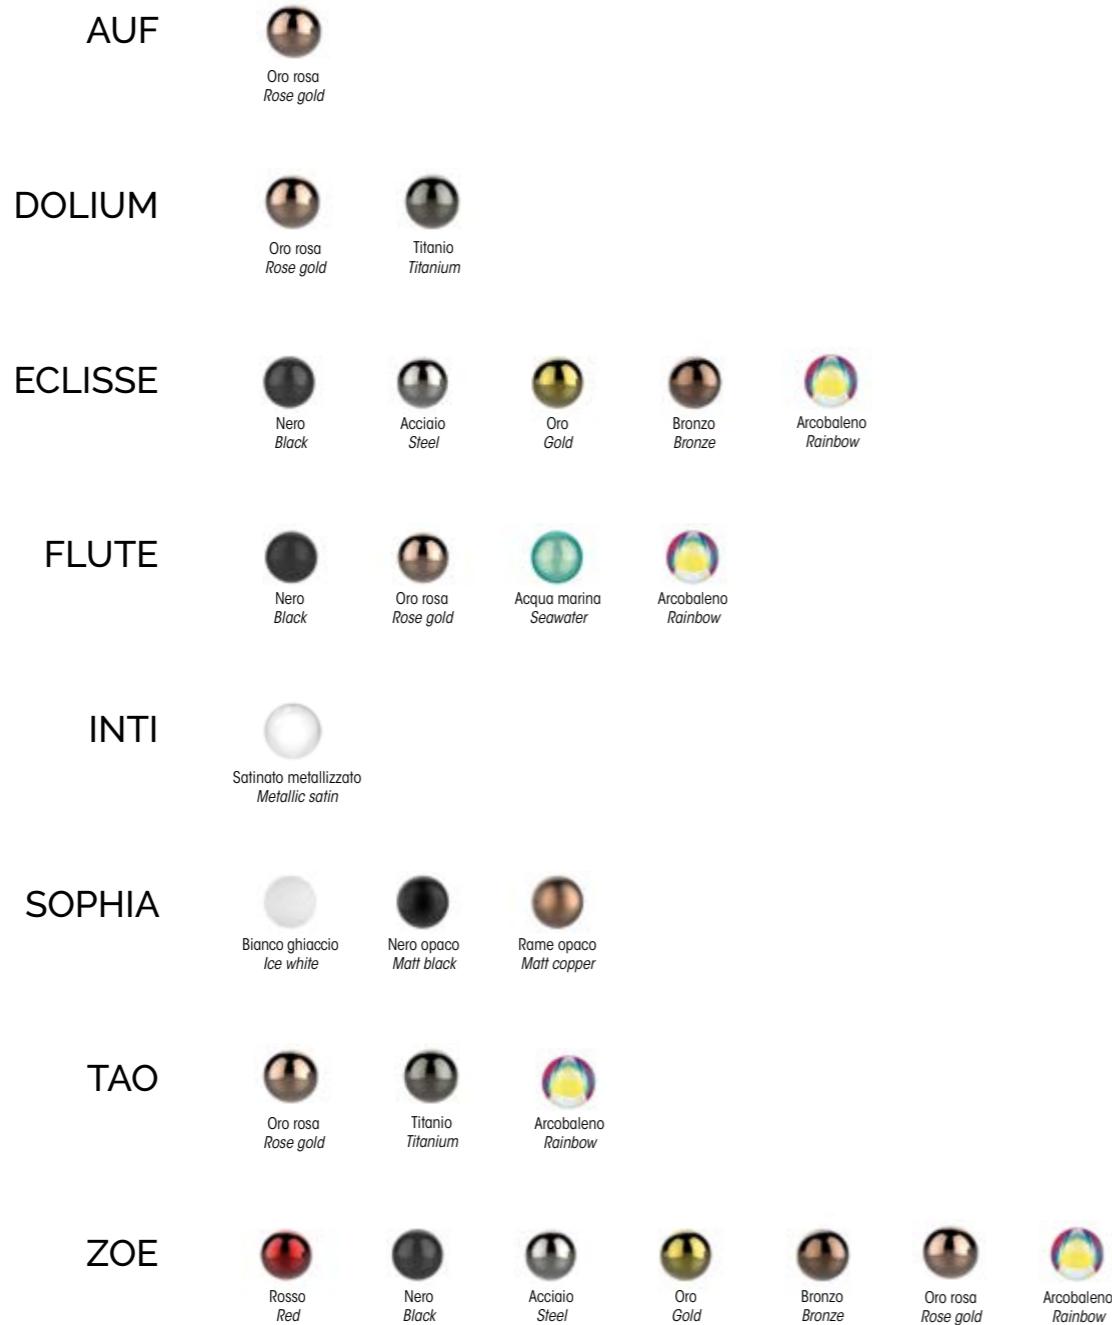

*It is advisable not to use them in closed diffusers such as item Goccia.
For each series it has been inserted the color chart for diffusers, please respect it.*

Il colore VIOLA con l'accensione della lampadina si opacizza.
Non è un difetto ma una reazione della luce sul colore stesso.

VIOLET colour becomes opaque with the lighting of the bulb.
It is not a defect but a reaction to the color of the light itself.
